

步驟三 完成api串聯

這個我也弄了很久，過程有因為更新發生了一些問題，但結果是好的。

The screenshot shows a VS Code editor with a project structure on the left and a terminal window on the right. The project structure includes files like `W07HW.md`, `ps5.ejs`, `ps5-2.ejs`, `midproj_40.js`, `ps5.js`, `ps5-2.js`, `database.js`, `package.json`, `ps5.css`, and `app.js`. The terminal window shows the output of the `node database` command, which prints a large JSON array of objects. Each object has properties like `id`, `name`, `size`, `remote_url`, and `description`. The terminal also shows the prompt `$` and the command `node database`.

```
utils |> JS database.js > ...
18 // password: '0000',
19 // port: '5432',
20 // });
21 // }
```

```
as218@LAPTOP-L2LN1PDG MINGW64 ~/OneDrive/桌面/SQL/W07-W18/1101-db-midproj-209410140/utils (main)
$ node database
